

8th Grade Lesson 120

- I can find the volume & surface area of pyramids & cones.
- I can find the volume of spheres.

triangular
pyramid.

rectangular
pyramid

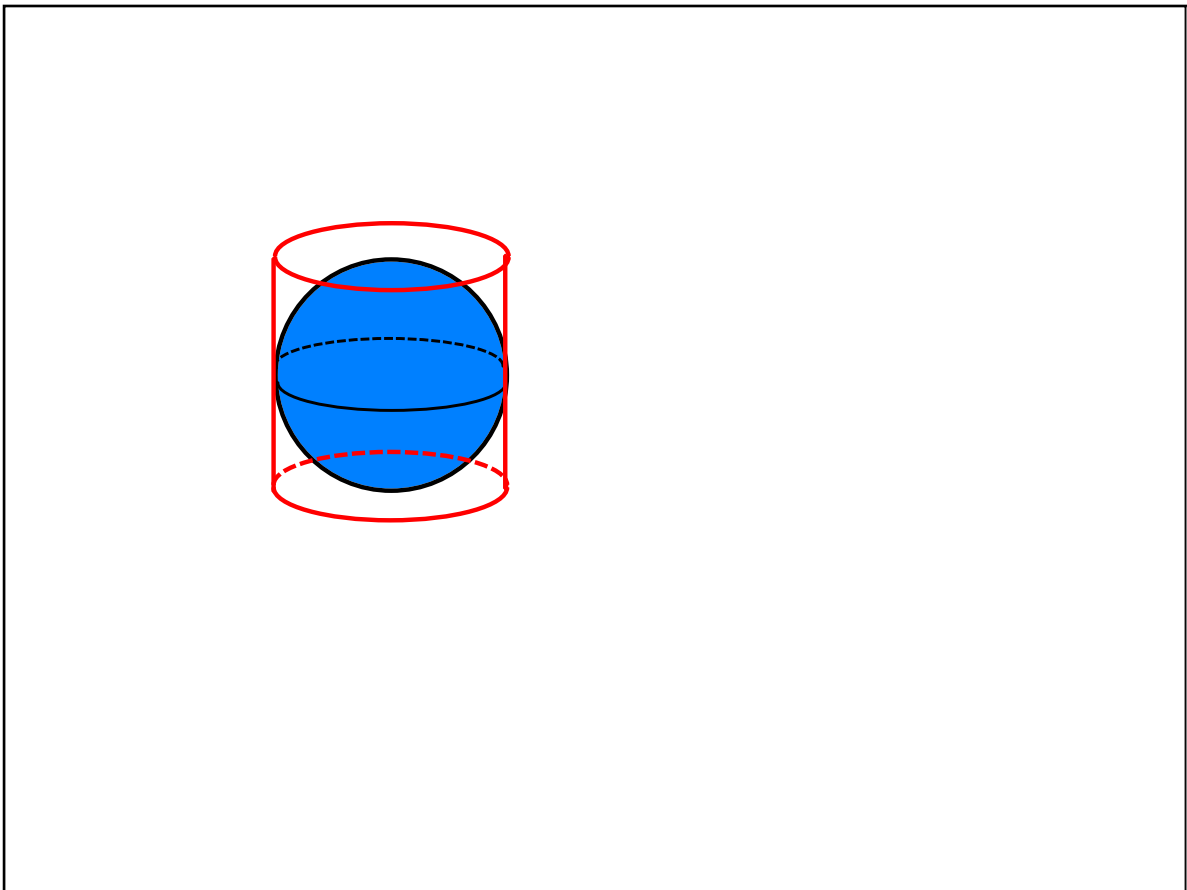

Circular
cone

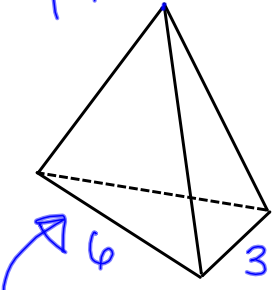

$$V = \frac{4}{3} r^3 \pi$$

Sphere

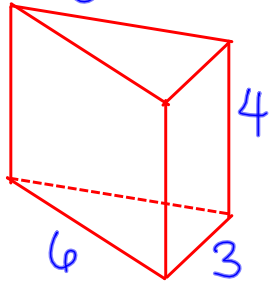

pyramid

$$V = \frac{1}{3} \cdot 36\text{m}^3$$

$$= 12\text{m}^3$$

right solid

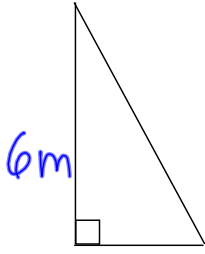

$$V = Bh$$

$$V = (9\text{m}^2)(4\text{m})$$

$$= 36\text{m}^3$$

base

$$B = \frac{3 \cdot 6}{2} = 9\text{m}^2$$

circular cone

$$V = \frac{1}{3} \cdot 1256$$

$$= 418\frac{2}{3}\text{cm}^3$$

cylinder

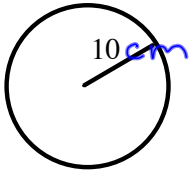

$$V = Bh$$

$$V = 314 \cdot 4$$

$$= 1256\text{cm}^3$$

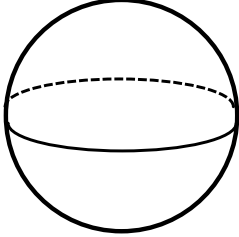

base

$$B = r^2 \cdot \pi = 10^2 \cdot 3.14$$

$$= 314\text{cm}^2$$

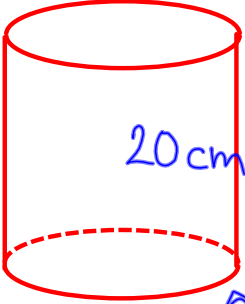

Sphere

$$V = \frac{2}{3} \cdot 6280$$

$$= 4186\frac{2}{3} \text{ cm}^3$$

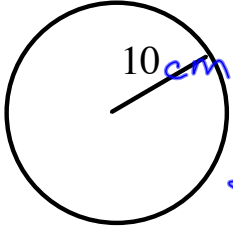

Cylinder

$$V = 314 \cdot 20$$

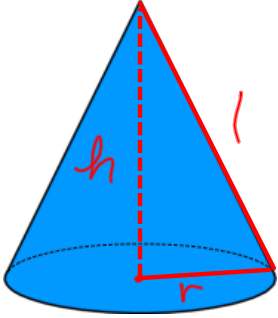

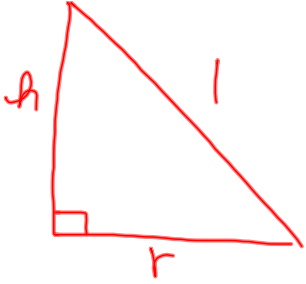

$$= 6280 \text{ cm}^3$$

Base

$$B = 10^2 \cdot 3.14$$

$$= 314 \text{ cm}^2$$

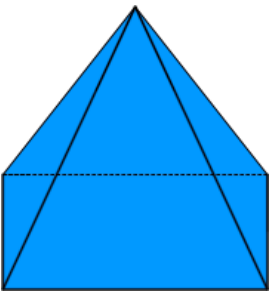

$$SA = B + LA$$

l = slant height

$$LA \text{ of circular cone} = r \cdot l \cdot \pi$$

$$SA = B + LA = r^2 \cdot \pi + r \cdot l \cdot \pi$$

$SA = B + LA$

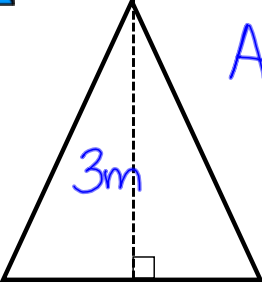

4m

$B = 16\text{m}^2$

4m

$SA = 16 + 24 = 40\text{m}^2$

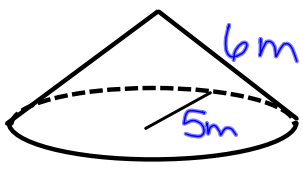

3m

4m

$A = \frac{4 \cdot 3}{2} = 6\text{m}^2$

$LA = 6 \cdot 4 = 24\text{m}^2$

$B = r^2 \cdot \pi = 5^2 \cdot \pi$

$= 25\pi\text{m}^2$

$LA = r \cdot l \cdot \pi = 5 \cdot 6 \cdot \pi$

$= 30\pi\text{m}^2$

$SA = 25\pi + 30\pi$

$= 55\pi\text{m}^2 = 172.7\text{m}^2$

Assignment

~~Pg. 381 Practice A-D and PS 120 #6-10~~
